Software Engineer Intern

10/2022 – 03/2023

- Designed and implemented cross-platform apps using PHP, Laravel, JavaScript, HTML, Bootstrap, and CSS for seamless UX.
- Delivered clean, efficient, and modular code while adhering to best practices across multiple projects.
- Tested, debugged, and optimized RESTful APIs, improving performance and reliability.
- Applied advanced OOP techniques to build secure, scalable, and reusable solutions.
- Collaborated in a fast-paced team to deliver client-focused software on time.

PROJECTS

Adviser Bangladesh

Role: Full-Stack Developer | Tech Stack: Laravel, MySQL, HTML, CSS, Bootstrap, JavaScript

Built a scalable platform connecting users with advisors, implementing dashboards, live notifications, area-based suggestions, and a matching algorithm for efficient service delivery.

Educare

Role: Backend Developer | Tech Stack: Laravel, MySQL

Designed APIs and database systems for student services, including visa tracking, applications, and CRM, enabling seamless access to global educational opportunities.

Smart Nir

Role: Backend Developer | Tech Stack: Laravel, MySQL

Developed APIs and database systems for building management, including user management, accounting, payments, and live notifications.

Regulated Advice UK

Role: Backend Developer | Tech Stack: Laravel, MySQL

Developed APIs and databases for advisor-client management, including lead tracking, appointment systems, and dynamic landing pages.

HR Matrix

Role: Backend Developer | Tech Stack: Laravel, MySQL

Developed APIs and databases to optimize HR functions like attendance, payroll, leave tracking, and inventory management.

Kazi Fashion House

Role: Fullstack Developer | Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

Developed a dynamic e-commerce platform with features like product allocation, live stock tracking, secure payment integration, and seller/buyer roles, while also optimizing product visibility and providing 24/7 support for users.

Deshi Trust

Role: Backend Developer | Tech Stack: Laravel, MySQL

Developed the backend for a multi-vendor e-commerce platform with dynamic user profiles, product allocation, secure payments, and live stock tracking, focusing on eco-friendly products and empowering vendors in Bangladesh.

Yaabi

Role: Backend Developer | Tech Stack: Laravel, MySQL

Implemented backend features like SMS campaigns, user authentication, and analytics, building APIs for seamless communication, user management, and real-time data tracking to enhance platform performance and UX.

Oggato

Role: Backend Developer | Tech Stack: Laravel, MySQL

Worked on backend API implementation, focusing on real-time one-to-one and global chat features. Developed robust APIs to support seamless communication between users, ensuring a smooth and responsive messaging experience across the platform.

Du Alumni Association

Role: Backend Developer | Tech Stack: Laravel, MySQL

Implemented backend features like user authentication, subscription management, event handling, donation processing, and scholarship payments, integrating SSLCommerz for secure transactions.
